

HEMP CBD WILL

Change Your View

"We set out to CHANGE ONE horse"

'Angel,' this one little Arabian mare, changed.
... It was **'MAGICAL!'**

We didn't have all the answers. She needed us to try it. What we witnessed within days, ONE Tbsp a day, changed Angel and our view of hemp CBD forever. We felt we had the best kept secret in our hands, so we set out to change a second horse. Scooby, this old, blind, and extremely handsome Appy, he changed too. . . Again, it was **MAGICAL!** One Tbsp, he's no longer arthritically camped out. **WOW!** The root of our passion and the beginning of Rocky Mountain Girls Hemp began right there . . . To change the lives of so many more horses, dogs, cats...and PEOPLE. Dawn and Misty are still in awe of CBD. They can't stop sharing, researching, educating, administering and consuming CBD; the benefits are too vast. They are proud to be part of the CBD movement, changing the view of this brilliant plant and its compassionate and powerful health properties.

500 mg 1 oz - \$55 & 1000 mg 2 oz \$90

CBD HEMP BALM!

Is the Bomb! For People, Pets & Horses

Reviews are gleaming with positive results from customers who have used RMG Hemp CBD Balm for:

- Arthritis, Back/Headache/Neck/Nerve Pain, Cancer,
- Dry Skin/Eczema/Psoriasis/Shingles,
- Equine Laminitis, Even Skin Tone/Lighten Age Spots/Lips,
- Hair Growth, Inflammation, Injury/Surgery Recovery,
- Menstrual Cramps, Neuropathy, Pain Relief,
- Plantar Fasciitis, Restless Legs, Soreness,
- Tumors on Horses & Dogs, Wounds

Thank you Rocky Mountain Girls for a product that works! I just want to say that your CBD balm is the bomb! I was diagnosed with Degenerative Disc Disease, pinched nerves and chronic stress. I have tried all kinds of products to help with back and nerve pain, with little success. Then, my daughter gave me a jar of Rocky Mountain Girls Balm to try. The first application was in the middle of the night. Within minutes, I was able to fall back to sleep without pain. The next day I began using it on other parts of my body with similar results. I thought, "What if this balm works on my heel pain?" I had been suffering with the painful Plantar Fasciitis diagnosis for two months. Going to physical therapy for my back was almost impossible because of hobbling on one foot, so before I left for my next appointment, I rubbed about 1/8 tsp of the balm into my heel and covered it with my sock. To my delight, I was able to do all the exercises and even forgot that I had a problem! I continued using the balm 3x's a day and now, only a week later, I am 90% free of pain. When I experienced these wonderful results, I checked out the Rocky Mountain Girls website for myself and found that they had other products; products I could take for stress and panic attacks. After some experimentation, I found the 25 mg CBD soft gels to be the most effective when taken daily. I carry them in my purse. If I am feeling stressed out, I take one. I don't have to worry about taking too much, just what I need. Life is wonderful without panic and fear. I love that I don't have to take Prozac or a pharmaceutical that has side effects. This is a new day for me and I'm loving being me again! Thanks! **-Donna S.**

FULL OR BROAD SPECTRUM?

Simply put: Rocky Mountain Girls Broad Spectrum contains 0.0% THC and Full Spectrum contains 0.3% THC or less (non intoxicating). RMG products all contain the major cannabinoid, Cannabidiol (CBD), and other cannabinoids, plus terpenes. Carrier oils are grapeseed or MCT from organic coconut. Gentle extraction methods of CO2 and Ethanol are both used to gently preserve the opulence and ability of the phytonutrients to synergistically work together.

CBD TINCTURES

BROAD SPECTRUM FOR PEOPLE

FULL SPECTRUM SOFTGELS

12 mg \$55
32 mg \$85

BE RESTORED

ENDO-CANNABINOID SYSTEM

We all have one, animals too! It runs through your entire body. It plays a crucial role in our health and well-being, it's job is to bring homeostasis to the body. A multitude of ailments have been linked to a sub-par Endocannabinoid System (ECS). Introducing phytocannabinoids into the system gives our ECS a huge boost and helps naturally bring our body back to optimum performance levels. People have used cannabinoids to help with health problems like Anxiety, Arthritis, Depression, Digestive Issues, Inflammation, Insomnia, Migraines, Pain Relief, Skin Disorders and many more.

THE HUMAN ENDOCANNABINOID SYSTEM

The endocannabinoid system consists of two receptors, called CB1 and CB2. These receptors are found on cell surfaces and impact various biological processes.

- CB1** Located in the brain, central nervous system, and many other parts of the body.
- CB2** Found throughout the body on cells associated with our immune system.

Cannabidiol (CBD)

CBD is one of the primary cannabinoids found in hemp. It interacts with CB1 and CB2 receptors for many effects still being studied.

HOW MUCH CBD DO I NEED?

Each ECS may respond differently to phytonutrients. Some may need more, some less. We suggest starting low with 5 mg CBD per day and slowly increase to a general dose of 25 mg per day. Doses may be divided into morning and evening.
